

Add Components (Model Objects) to Google Sketch up Google 3D Warehouse

Click on the **Get Models icon** in the top menu bar.

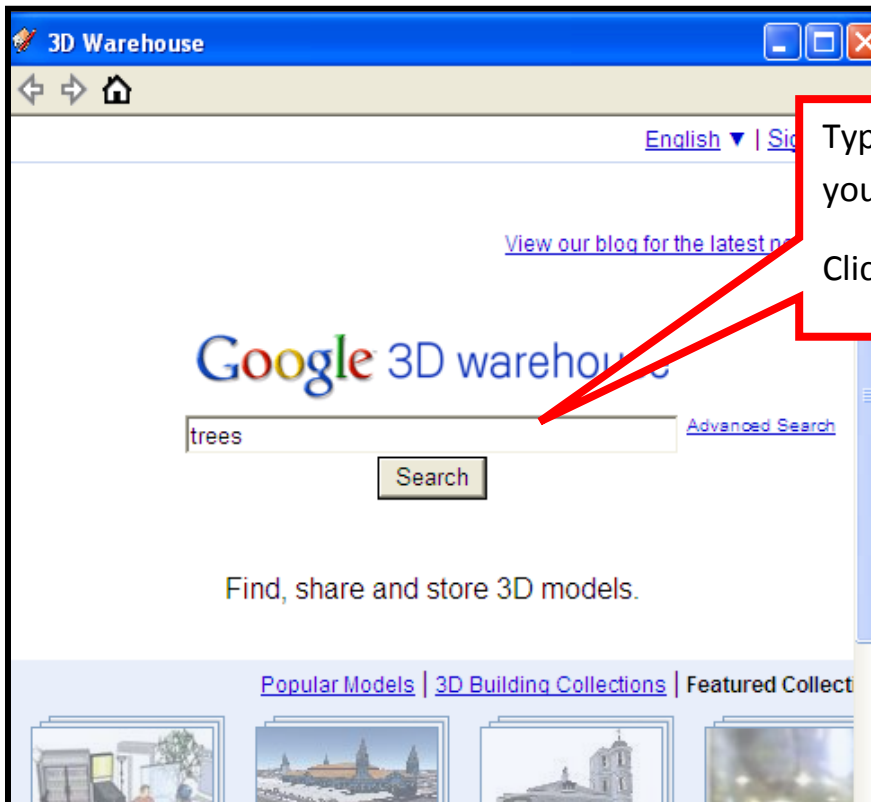

It is a brown box with a yellow arrow pointing down.

You can also click on **File** in the menu bar.

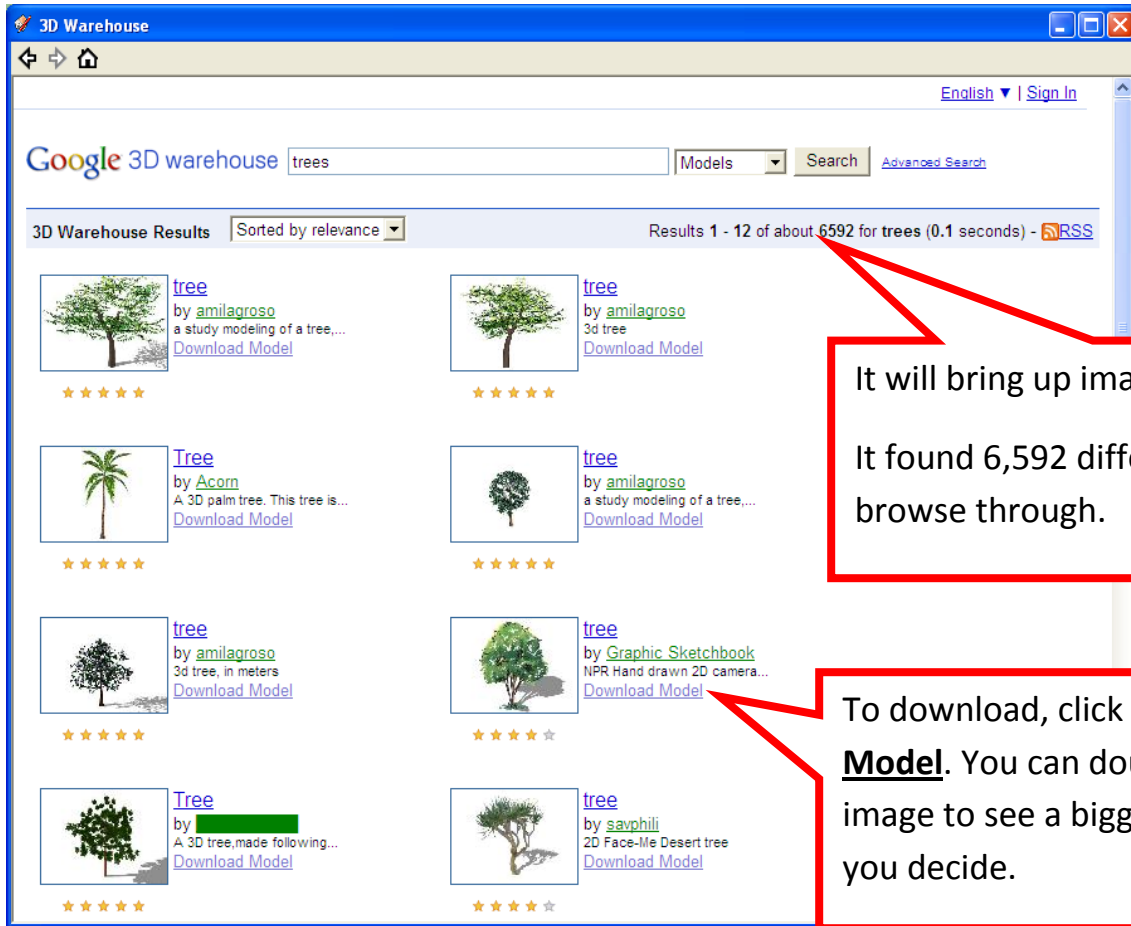

3D Warehouse > Get Models...

It will take you to the 3D Warehouse website

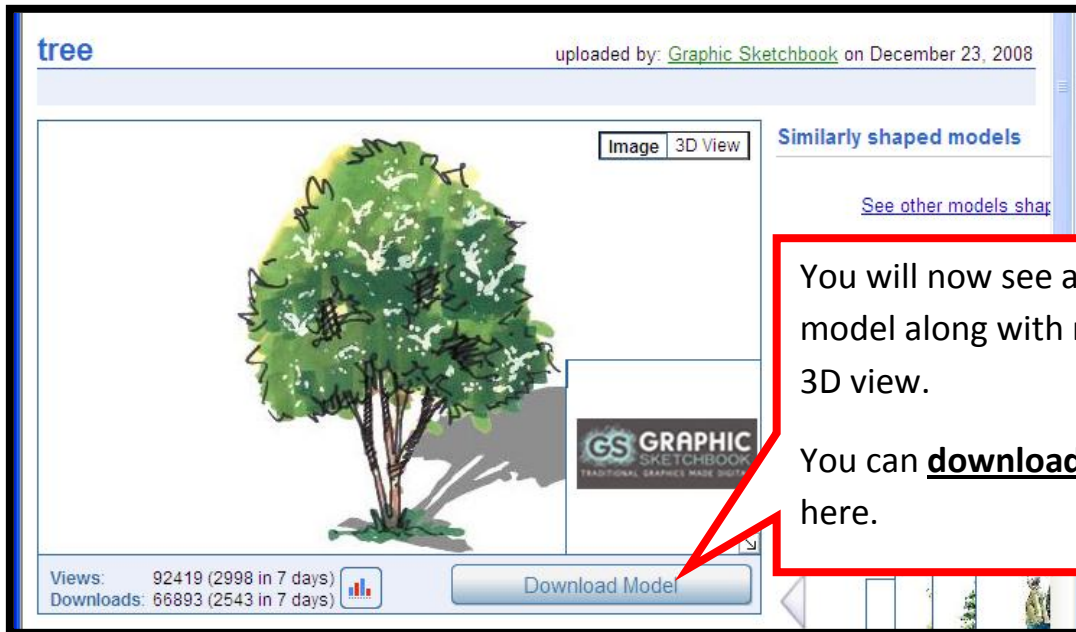

Type what you want to bring into your design. Here I typed trees.

Click **Search**

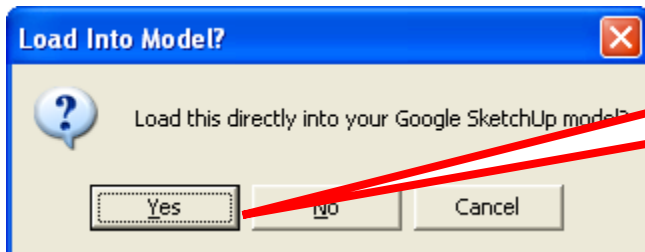

It will bring up images of trees.
It found 6,592 different trees I can browse through.

To download, click on **Download Model**. You can double click on an image to see a bigger version before you decide.

You will now see a larger view of the model along with more details such as 3D view.
You can **download the model** from here.

Click on yes to bring it into your current project.
